

Attendance Report

Date	Project	Hours	Remarks
20/04/2022	Self Learning - Engineering	08:10	- handle soft-delete data at getOrderDetails - manage empty data at transform time - sonar-qube setup done for code review - setup zsh & android studio for react native
19/04/2022	Self Learning - Engineering	08:00	- working on xlsx download issue - sonarqube integration done with docker - setup react native on pc - go threw sonarqube code review and understand code smells in it
15/04/2022	Self Learning - Engineering	08:10	- some bug fixing in thirdinrev project - setup sonarqube for sample project and try for developed project
14/04/2022	Self Learning - Engineering	08:05	- setup docker for sonar quibe - setup sonarquibe using docker
13/04/2022	Events - Engineering	00:30	- Wow Wednesday
	Self Learning - Engineering	07:30	- learn about sonarquibe for code review - set up sonarquibe in pc with jdk and others
12/04/2022	Self Learning - Engineering	04:30	- setup docker and minikuber for learning purpose and dual boot system
	Thirdinrev Global - Dental Web Portal	03:00	- bug fixed for order status update - modify seeder & bug-fixed for add model
11/04/2022	Self Learning - Engineering	07:30	- backup data for installing ubuntu in system - formate hdd for new installation
	Thirdinrev Global - Dental Web Portal	00:30	- add model time bug fixed
08/04/2022	Self Learning - Engineering	07:40	learning about docker and install docker on windows with wsl - install ubuntu on my laptop - setup pc bcz it's all data crashed
07/04/2022	Thirdinrev Global - Dental Web Portal	08:10	- changes for email send and config done with env update - pending_order_list meta send with proper length - added: addons data in response of invoice generate - new migration added for foreign key - payment bug fixed - background color changes for email template done
06/04/2022	Events - Engineering	00:40	- Food Event
	Thirdinrev Global - Dental Web Portal	07:40	- bug fixed for razorpay payment - added: multial addon allowed - added addons in totalamount verification for razorpay - price field added in addons
05/04/2022	Events - Engineering	00:30	- Food event recipes discussion
	Thirdinrev Global - Dental Web Portal	07:20	- name changed for project to quiteclear - change-password respond with token added - removed: tokens for user when password changed - updated: mail send one step before response
04/04/2022	Thirdinrev Global - Dental Web Portal	08:10	- added: default value for user payment - removed: default value 0 for payment in users and invoice

			<ul style="list-style-type: none"> - changed: enum for payment method in user and invoice table - managed: duplicate entry for brand, model and trim done - optimized: query for getOrdersofUser
01/04/2022	Kaizen	07:45	<ul style="list-style-type: none"> - bug fixed: for order status in csv file - modified: deletedAt default value to null for category - changed: deleted things are not visible in get api - help dhruv for invoice pdf UI changes
31/03/2022	Thiridinrev Global - Dental Web Portal	08:40	<ul style="list-style-type: none"> - multipal device login functionality added - email changes done - changed: code for generate pdf form backend to json response - help dhruv to create formate of pdf from frontend
30/03/2022	Events - Engineering	00:30	Wow Wednesday
	Thiridinrev Global - Dental Web Portal	07:30	<ul style="list-style-type: none"> - bug: solved for users excel download - changed: function to arrow function in dao - changed: pdf height and width to check proper formate - try to solve pdf download and styling issue with dhruv
29/03/2022	Thiridinrev Global - Dental Web Portal	09:00	<ul style="list-style-type: none"> - handle: null value for revenue api - changes: in invoice_template & optimize logic - changed: invoice template styling & changed: console proper & remove console.log & changed: in excel tranform login - added: status in order table & optimize query for listing - changed: pdf height and width to check proper formate - changed: function to arrow function in dao
28/03/2022	Thiridinrev Global - Dental Web Portal	08:45	<ul style="list-style-type: none"> - changed: package to convert html to pdf - added: payment method in get orders - added: transformer for invoice data in pdf - added: invoice template & crete API's to download invoice
25/03/2022	Thiridinrev Global - Dental Web Portal	08:20	<ul style="list-style-type: none"> - updated: proper pagination response in listing api - added: searching with term in all listing api - added: config get API's for user & changed: type searching to query - changed: config API to search data in query - changed: in email template final design - added: revenue API's for admin
24/03/2022	Thiridinrev Global - Dental Web Portal	06:30	<ul style="list-style-type: none"> - changed: column type for all pricing related data - added: name base searching of order - added: seeder for configs - changes: in address API's for users - working on invoice download for specific order
23/03/2022	Thiridinrev Global - Dental Web Portal	09:00	<ul style="list-style-type: none"> - added: pincode transformer - changes: in patient API's response done & address API's request data - update: email template for orders - added: productById method & optimized: code - added: config CRUD & validation in all admin routes

			removed: unnecessary imports
22/03/2022	Thordinrev Global - Dental Web Portal	09:00	<ul style="list-style-type: none"> - added: validation in middleware for brand & trim - added: validation in aligner & model - added: validation in middleware, change: pagination logic - added: authorization in each route solved: bug for pagination - changes: in mail template for order - added: validation in routes for all user API's, optimized: code
21/03/2022	Thordinrev Global - Dental Web Portal	08:30	<ul style="list-style-type: none"> - changes in csv file download - bug fixed for empty data in result - add static value for pagination - add admin authorization in csv file download route - email send on create order and status update of order - create ejs file email template
17/03/2022	Thordinrev Global - Dental Web Portal	08:00	<ul style="list-style-type: none"> - csv file for orders and users create function done - use moment package for date format - learn about exceljs and use it to download excel file of all orders and users - discuss about payment flow of razerpay
16/03/2022	Thordinrev Global - Dental Web Portal	11:30	<ul style="list-style-type: none"> - csv file data ready for users & create transformer for it - csv download for orders done & create transformer for it & use json2csv - shippingcost route set properly & new seeder added and some modified - done dashboard api's for user - change in meta for getOrderList - send next status of order when hit updateOrderStatus
15/03/2022	Thordinrev Global - Dental Web Portal	08:10	<ul style="list-style-type: none"> - promoteuser route changes done - is_blocked field required for getUser - send message based on user blockStatus - pincode id added in get user by id - order_status display it's current status & return order_status as array
14/03/2022	Thordinrev Global - Dental Web Portal	08:30	<ul style="list-style-type: none"> - user block-unblock api done in one route - change user role api tested and done - add delivered_on in order, when order_status is delivered - dd fix id based on order_status at getdetailsOfOrder
11/03/2022	Thordinrev Global - Dental Web Portal	06:00	<ul style="list-style-type: none"> - authorization add in admin route - updateOrder status api done - validation check for all CRUD - block, unblock API done
10/03/2022	Events - Engineering	01:00	- session by dhaval sir
	Thordinrev Global - Dental Web Portal	07:30	<ul style="list-style-type: none"> - added name in getorder of brand, aligner and model - update and edit address of order created - changes in order model and add seeder data
09/03/2022	Thordinrev Global - Dental Web Portal	07:50	<ul style="list-style-type: none"> - validation and empty obj checks added in order api - added pagination in all orders api's
08/03/2022	Thordinrev Global - Dental Web Portal	08:05	- create api's to find particualr users order, patient orders

			- authorization access check added in addproduct
07/03/2022	Events - Engineering	00:50	- session by dhaval sir
	Thirdinrev Global - Dental Web Portal	07:05	- validate order based on product_id - add attributes in query with raw:true to get required fields only - seeder modified for dummy create for api
04/03/2022	Thirdinrev Global - Dental Web Portal	08:10	- token table created and login user token in it and also validate with database - common routes added in user routes - create transformer for orderData and patientData - 3D model order created successfully - add field in order_details table to save 3D model data
03/03/2022	Thirdinrev Global - Dental Web Portal	07:55	- res of pincode api changed with array of pincodes - add extra field in get patient api like address, pincode, city, state etc - add extra field at validation in req.user with user role to authorized user
02/03/2022	Thirdinrev Global - Dental Web Portal	08:10	- create order with files path and create function to add path in database - pincode api added - get pincode with subset of string added
01/03/2022	Thirdinrev Global - Dental Web Portal	08:05	- create get order api for user and admin - add role_id in token for verify user role easily in each request - create get order api for specific user
28/02/2022	Thirdinrev Global - Dental Web Portal	08:00	- update order & order_details table - create api for create order - create dummy data structure for orderObject - add new seeder required in order table as id
25/02/2022	Events - Engineering	01:00	- remarkable Friday - docker session by jay rajvadiya
	Thirdinrev Global - Dental Web Portal	07:00	- resolve issues in code - add role in token as well for easy authorization - setup route in proper manner - for token created middleware for repeated tasks - add extra data in seeder for order apis
24/02/2022	Thirdinrev Global - Dental Web Portal	08:00	- catchAsync added for error return as stack at response - foreign key added in migration - set migration in proper manner for foreign key reference - changed in database model and order model created
23/02/2022	Events - Engineering	00:15	Wow Wednesday
	Thirdinrev Global - Dental Web Portal	07:45	- new models created - dynamic env changes - formate code and add const data in single file
22/02/2022	Events - Engineering	01:00	session by dhaval sir
	Thirdinrev Global - Dental Web Portal	07:00	- added error handling - put file in proper formate - go throw code for working flow
21/02/2022	Events - Engineering	01:00	chat with dhaval sir Regarding reviews
	Thirdinrev Global - Dental Web Portal	07:00	- api testing for each route - go throw code and approach to write code
18/02/2022	Kaizen	08:00	-- interview portal

			<ul style="list-style-type: none"> - some ui dynamic changes added in candidate management - go throw new project backend code - go throw postman collection of project
17/02/2022	Kaizen	08:00	<ul style="list-style-type: none"> -- interview portal - create static UI for sources with data - customize terminal for better development
			<ul style="list-style-type: none"> -- thirdinrev-dental - go throw project overview and requirements and also backend code
16/02/2022	Events - Engineering	00:15	WoW Wednesday
	Kaizen	08:15	<ul style="list-style-type: none"> -- interview portal - done candidate crud - code optimization for crud in file
15/02/2022	Kaizen	07:30	<ul style="list-style-type: none"> -- interview portal - candidate crud - changes in model for attachment and candidate - go throw front side for useful components that includes in requirement structure - learn about new npm packages like multer, form-data handling. - go throw changes in requirements of interview portal
14/02/2022	Kaizen	08:00	<ul style="list-style-type: none"> -- interview-module - create docs for feature in web part of portal - go throw the theme that has already there - add candidate side model and crud o/p in backend of portal
11/02/2022	Kaizen	08:00	<ul style="list-style-type: none"> -- interview-portal-api - crud operation on attachment done - changes in system setting for better work
10/02/2022	Kaizen	08:00	<ul style="list-style-type: none"> -- interview-module-api - learn about multer - create model for attachments - done file upload - live app with localhost throw lan
09/02/2022	Events - Engineering	00:30	- WoW Wednesday
	Kaizen	07:30	<ul style="list-style-type: none"> - interview-portal -- work with typeorm and mysql project to overview about interview-project-api and brainstorm on project
08/02/2022	Training Program - Engineering	01:00	<ul style="list-style-type: none"> - learn typescript - learn typeorm
	Kaizen	07:00	<ul style="list-style-type: none"> - task module -- learn about migration in orm -- work with package sequelize
			<ul style="list-style-type: none"> - interview-module -- overview about already defined project -- go threw project
07/02/2022	Training Program - Engineering	07:00	<ul style="list-style-type: none"> - setup local mysql database - create 2 ssl keys for diff accounts
	Events - Engineering	01:00	- breaf about new task that is task-management app
05/02/2022	Self Learning - Engineering	08:00	<ul style="list-style-type: none"> - setup database to local - mysql with xampp server and phpmyadmin

			<ul style="list-style-type: none"> - postgres with pgadmin - simple crud operation on postgres database with nodejs using docker
03/02/2022	Training Program - Engineering	01:00	- git session by jigarbhai on how to work on branch, resolve conflicts.
	Self Learning - Engineering	07:05	<ul style="list-style-type: none"> - implement redux in chat app & solve redirect issues - learn about ORM with sequelize
02/02/2022	Self Learning - Engineering	08:10	<ul style="list-style-type: none"> - learn website deployment using github-pages - add custom domain to my portfolio - learn typescript with sequelize with sqlite3 as rest-api
01/02/2022	Self Learning - Engineering	07:45	<ul style="list-style-type: none"> - learn react in typescript from yt - react router from yt codevolution
31/01/2022	Self Learning - Engineering	08:00	<ul style="list-style-type: none"> - learn deployment decently connect with github - learn react-router from yt playlist
28/01/2022	Self Learning - Engineering	08:00	<ul style="list-style-type: none"> - complete React, Hooks, Redux playlist of codevolution on yt. - learn about context api and diff btw it and redux store. - working on group chat part in chat-app
27/01/2022	Self Learning - Engineering	08:00	<ul style="list-style-type: none"> - todolist task done - learn deployment of react app on various platform like heroku, github pages, netlify.
26/01/2022	Self Learning - Engineering	08:00	<ul style="list-style-type: none"> - workend on frontend of todo - explore hooks new methods to access redux store
25/01/2022	Self Learning - Engineering	08:00	<ul style="list-style-type: none"> - redux store manipulate to store todo data - redux toolkit overview
24/01/2022	Self Learning - Engineering	08:00	<ul style="list-style-type: none"> - solve socket related bugs in given task - learn about redux store in react
21/01/2022	Self Learning - Engineering	08:00	<ul style="list-style-type: none"> - change in backend as required at frontend, connect both part. - display data dynamically form api call - react hooks intro
20/01/2022	Self Learning - Engineering	06:30	<ul style="list-style-type: none"> - use github in project - learn api call in react - learn about deployment site like heroku and netlify
19/01/2022	Events - Engineering	02:00	- react router redux hooks axios session by rushi nariya
	Self Learning - Engineering	06:30	<ul style="list-style-type: none"> - design models for database and define routes for given task - api call in react learn
18/01/2022	Self Learning - Engineering	08:30	<ul style="list-style-type: none"> - prepare backend for given chat-app task - learn about sequelized database used with nodejs
17/01/2022	Self Learning - Engineering	08:05	<ul style="list-style-type: none"> - Assign real time chat app - learn about react life cycle methods - learn socketio use in assign project
13/01/2022	Self Learning - Engineering	08:00	<ul style="list-style-type: none"> - work on database query on phpmyadmin - learn advance query on SQL and work with phpmyadmin
12/01/2022	Self Learning - Engineering	08:00	<ul style="list-style-type: none"> - Learn React Event handling. - Create table based on e-r diagram. - write query based on given task on database.
11/01/2022	Training Program - Engineering	03:40	- Task to design database e-r diagram
	Self Learning - Engineering	03:30	- Watch videos of code evalution for REACT

	Events - Engineering	01:00	- session on git, github and gitlab
10/01/2022	Self Learning - Engineering	01:00	- bootstrap class breaf intro
	Events - Engineering	07:00	- Hackthon presentation
07/01/2022	Events - Engineering	08:00	- hackthon 2022 implementation phase - create API in NodeJS
06/01/2022	Self Learning - Engineering	03:30	- Task 1 Done with proper UI.
	Events - Engineering	04:40	- Hackthon ideation phase
05/01/2022	Self Learning - Engineering	08:00	- Task 1 done (website create with HTML, CSS, bootstrap) - learn bootstrap
	Events - Engineering	00:20	WoW Wednesday
04/01/2022	Self Learning - Engineering	08:25	- create one profile page using (html/css). - same profile page then create in react and explore use of bootstrap. - basics of jsx
03/01/2022	Self Learning - Engineering	08:15	- learn react basic & create tic-tac-toe app

Hours For 01/01/2022 to 20/04/2022

Kaizen	78:0
Training Program - Engineering	12:40
Events - Engineering	32:0
Thiridinrev Global - Dental Web Portal	259:50
Self Learning - Engineering	216:50
Extra Hours	8:0
Other	0:0
Total Hours	607:20
